

In the abstract on pages 92 and 93, please substitute the following abstract. A marked copy showing changes to the abstract is listed below.

(Amended) An aqueous coating material comprising

- A²
- A) at least one polyester that is water-soluble or water-dispersible,
 - B) at least one polyurethane acrylate that is water-soluble or water-dispersible,
 - C) at least one amino resin that is itself water-soluble or water-dispersible or is water-soluble or water-dispersible in the presence of the polyester and the polyurethane acrylate,
 - D) at least one of a color pigment, an effect pigment, a color and effect pigment, and a filler, and
 - E) optionally at least one polyisocyanate.

Also, processes for preparing and using the aqueous coating material.

IN THE CLAIMS:

Please cancel claims 1-16 without prejudice or disclaimer.

Please add claims 17-54.

17. (New) An aqueous coating material comprising

- A³
- A) at least one polyester that is water-soluble or water-dispersible,
 - B) at least one polyurethane acrylate that is water-soluble or water-dispersible,
 - C) at least one amino resin that is itself water-soluble or water-dispersible or is water-soluble or water-dispersible in the presence of the polyester and the polyurethane acrylate,
 - D) at least one of a color pigment, an effect pigment, a color and effect pigment, and a filler, and
 - E) optionally, at least one polyisocyanate,

wherein the polyester comprises a reaction product of

a1) a mixture comprising

- a11) from 40 to 80 mol% of at least one of an aliphatic polycarboxylic acid, a cycloaliphatic polycarboxylic acid, an esterifiable derivative of an aliphatic polycarboxylic acid, and an esterifiable derivative of a cycloaliphatic polycarboxylic acid,
